**SUPPLEMENTARY INFORMATION:**

**I. BACKGROUND**

The Commission hereby gives notice that, pursuant to Section 189a of the Atomic Energy Act (AEA) of 1954, as amended (the Act), it will convene an evidentiary session to receive testimony and exhibits in the proceeding regarding the SHINE application for a CP

under part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), to construct a medical radioisotope production facility in Janesville, Wisconsin.

Part one of the SHINE's CP application was submitted by letter dated March 26, 2013 (ADAMS Accession No. ML13088A192), and by letter dated May 31, 2013 (ADAMS Accession No. ML13172A361), SHINE submitted the second and final part of its two-part application for a CP. By letter dated September 25, 2013 (ADAMS Accession No. ML13269A378), SHINE supplemented this submission with a discussion of preliminary plans for coping with emergencies, as required by 10 CFR 50.34(a)(10), completing its application for a CP. The construction permit application, including the environmental report, may be viewed in its entirety at ADAMS Accession No. ML13172A324. This mandatory hearing will concern safety and environmental matters relating to the requested CP application, as more fully described below.

## **II. EVIDENTIARY UNCONTESTED HEARING**

## **III. PRESIDING OFFICER**

## **IV. MATTERS TO BE CONSIDERED**

The matter at issue in this proceeding is whether the review of the SHINE CP application by the Commission's staff has been adequate to support the findings found in 10 CFR 50.35, 50.40, 50.50, and 10 CFR 51.105. Those findings are as follows:

## **Issues Pursuant to the Atomic Energy Act of 1954, as Amended**

With respect to the CP: (1) whether the applicant has described the proposed design of the facility, including, but not limited to, the principal architectural and engineering criteria for the design, and has identified the major features or components incorporated therein for the protection of the health and safety of the public; (2) whether such further technical or design information as may be required to complete the safety analysis, and which can reasonably be left for later consideration, will be supplied in the final safety analysis report (3) whether safety features or components, if any, which require research and development have been described by the applicant and the applicant has identified, and there will be conducted, a research and development program reasonably designed to resolve any safety questions associated with such features or components; (4) whether on the basis of the foregoing, there is reasonable assurance that, (i) such safety questions will be satisfactorily resolved at or before the latest date stated in the application for completion of construction of the proposed facility and (ii) taking into consideration the site criteria contained in 10 CFR part 100, the proposed facility can be constructed and operated at the proposed location without undue risk to the health and safety of the public; (5) whether there is reasonable assurance (i) that the construction of the facility will not endanger the health and safety of the public, and (ii) that construction activities can be conducted in compliance with the Commission's regulations; (6) whether the applicant is technically and financially qualified to engage in the proposed activities in accordance with the Commission's regulations in chapter I of title 10 of the CFR; (7) whether the issuance of a permit for the construction of the facility to the applicant will not, in the opinion of the Commission, be inimical to the common defense and security or to the health and safety of the public; and (8) whether the application meets the standards and requirements of the AEA and the Commission's regulations, and that notifications, if any, to other agencies or bodies have been duly made.

## **Issues Pursuant to the National Environmental Policy Act (NEPA) of 1969**

With respect to the CP: (1) determine whether the requirements of Sections 102(2)(A), (C), and (E) of NEPA and the applicable regulations in 10 CFR part 51 have been met; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; (3) determine, after weighing the environmental, economic, technical, and other benefits against environmental and other costs, and considering reasonable alternatives, whether the construction permit should be issued, denied, or appropriately conditioned to protect environmental values; and (4) determine whether the NEPA review conducted by the NRC staff has been adequate.
